SUMMARY

Frontend Developer | NextJs | React | React Native | Redux | Unit test

I'm code fan and self-taught person. I enjoy learning about life everyday and about frameworks and libs to enhance my skills and get new. I like working with people "making magic with code's line".

I studied and worked on hospitality and service so I work every day with empathy and humanism... not as a bot! I have a rule: "Be honest and respect to other" Vitto and Gennaro, my baby sons, has full priority.
